ASSAM INTRA STATE TRANSMISSION SYSTEM ENHANCEMENT PROJECT

1. Introduction

The Asian Infrastructure Investment Bank (AIIB) is extending financial assistance for Assam Intra-State Transmission System Enhancement Project (AISTSEP), to support the implementation of Power for All (PFA) plan. The AISTSEP is implemented by Assam Electricity Grid Corporation Limited (AEGCL). The Project under Phase I includes the construction of 10 new substation in 400kV, 220kV and 132kV voltage level along with the associated (332.945 km) transmission lines (TL), Conversion of one no. of existing AEGCL S/S (132/33kV Gohpur) from AIS to GIS; Augmentation of 14 existing substations (replacement of old transformers with new transformers); Augmentation of 186 km of transmission line (restringing of one Single Circuit (S/C) line and two Double Circuit (D/C) line) by High Temperature Low Sag (HTLS) conductors; Replacement of ground wire to Optical Power Ground Wire (OPGW) for 636 km of transmission lines and substation equipment at substations. The AEGCL is supported by a Project Management Consultant (PMC).

1.1 Package G

The construction of new 400/220kV Rangia and 132/33kV Kumarikata GIS Substation is under package-G. Rangia is approximately 78 km away from Guwahati City by Guwahati-Rangia-Tamulpur road. The road condition from Guwahati to Tamulpur is good which is National Highway (NH-127D) and then follow State Highway (SH10) up to the proposed substation site. Nearest Railway Station is Rangia which is 20 km from S/S. The package G provides for a GIS Substation having 2 nos. 500 MVA 400/220kV Transformers and 132/33kV (2 X 50 MVA) Transformers.

The power scenario of Rangia/ Kumarikata was very poor and cannot fulfill the demand of power supply in the entire area. Further, the Rangia is one of the load center and not able to provide sufficient electricity at the adjoining areas, Most part of the Lower Assam is scarcity of power supply and the substation is scattered where only 220/132 kV and 132/33 kV Rangia substation not able to meet the demand of power supply. Moreover, the incoming line to Rangia substation from Rangia -Salakati line could not fulfilled the electricity demand. As such, there has been a great increase in demand for power in lower Assam areas in recent times.

1.2 Land Requirement for Rangia

Initially it was decided to construct two separate substations of 400/220kV at Tamulpur and 220/132/33 kV at Kumarikata, but the suitable land was not available at Kumarikata. As there is no suitable Govt. land was available in Tamulpur area, hence, AEGCL has identified the suitable private land at Tamulpur for construction of proposed Rangia substation. However, to minimize the land requirement, AEGCL decided to build a single

Abbreviated Resettlement Action Plan cum Tribal Development Plan

ASSAM INTRA STATE TRANSMISSION SYSTEM ENHANCEMENT PROJECT

station and has identified suitable land at Tamulpur for construction of 400/220/132/33kV substation. The land area is 8.34 ha. The identified land proposed for substation has minimized the length of the proposed transmission line for 400/220 kV which is economical and impact on ROW would be minimized.

The project scope involves construction of substations and associated transmission lines. The construction of new 400/220kV (2X500MVA), GIS substation at Rangia and 132/33kV GIS substation (2X50MVA Transformers) at Kumarikata under package-G, has no physical displacement of any families. The impact is limited to land alienation only. In order to expedite the construction of the substation, AEGCL has purchased the required 8.34 ha land on willing buyer and willing seller basis on a price that is equal to the compensation under The Right to Fair Compensation and Transparency in Land Acquisition and Rehabilitation and Resettlement Act 2013, as per the Project's Environmental and Social Management Planning Framework (ESMPF): Resettlement Planning Framework chapter no 7.3.2. This 8.34 ha of private land is owned by 32 families. Out of these 32 Project Affected Families (PAF), five PAFs belong to Schedule Tribes Category. After identification of land, AEGCL approach to the Circle Officer, Tamulpur for acquisition of the land. The Circle Officer, Tamulpur then identified the land owners and subsequently all the relevant documents, willingness certificate along with the land details were collected from the land owners. The Circle Officer then sent all the relevant documents to the Secretary, Bodoland Territorial Council (BTC) for obtaining sale permission. The Secretary, BTC after checking all the documents, gave the necessary sale permission to Circle Officer for initiating the land procurement process. The Circle Officer after verifying all the necessary documents of the land owners, prepared the land valuation estimate and submitted to AEGCL along with the sale permission for payment of compensation to the PAFs.

The budget for land procurement for the subproject is estimated as ₹ 8,95,65,869/- and an additional ₹ 3,75,000/- for vulnerables assistance. The detailed estimate is attached under annexure 1.

2. Socio-Economic Survey of PAFs

The chapter provides the socio-economic profile of the 32 PAFs whose land was acquired for construction of the proposed new 400/220 kV Rangia and 132/33kV Kumarikata GIS substation. The profile of the affected households is captured from the socio- economic survey of 32 PAFs that was undertaken on 5 May 2022. All the 32 Project Affected Families are Titleholders and all these 32 PAFs suffered landloss where they used to cultivate paddy crops. The finding of the socio-economic census survey are given below:

Abbreviated Resettlement Action Plan cum Tribal Development Plan*ASSAM INTRA STATE TRANSMISSION SYSTEM ENHANCEMENT PROJECT***2.1 Affected Families**

The acquisition of land for sub-stations has affected 32 families that comprise 146 members. The adult female members are 54 and adult male members comprises 52, while rest 40 are children. The average family size of the affected families is 4.56.

Table 1: Distribution of PAFs Population

Sl. No	Gender	Number	Percentage
1	Adults Male	52	35.62
2	Adults Female	54	36.99
3	Children Male	23	15.75
4	Children Female	17	11.64
Total		146	100

2.2 Family Size

The majorities of families i.e., 21 have 4 – 6 family members, 8 of the families have 1 – 3 family members and the rest 3 families have 7 – 12 family members.

Table 2: Distribution of Households Size

Sl.No	Household Size	No. of PAFs	Percentage
1	1 to 3	8	25
2	4 to 6	21	65.63
3	7 to 12	3	9.38
Total		32	100

2.3 Literacy

As per socio-economic census survey information 15 affected families have family heads attending upto secondary level education. This is followed by 9 families have family heads attending up to graduate level and 3 of the families have family heads with primary level education. About 5 families have all illiterate family heads as mentioned in Table 3.

Table 3: Summary of Literacy Level

Sl. No	Education Status	Number of PAPs	Percentage
1	Illiterate	5	15.63
2	Primary (up to class 4)	3	9.38
3	Secondary (up to class 10)	15	46.88
4	Higher (up to graduate)	9	28.13

Abbreviated Resettlement Action Plan cum Tribal Development Plan*ASSAM INTRA STATE TRANSMISSION SYSTEM ENHANCEMENT PROJECT*

Total	32	100
--------------	-----------	------------

2.4 Landholding

As per the Government of Assam¹, the farmers are classified into a) Marginal (having below 1 ha. of land), b) Small (1 to 2 ha.), c) Semi-medium (2 to 4 ha.), d) Medium (4 to 10 ha.) and e) Large (above 10 ha.).

It is noted that eleven households are Marginal, eleven households are Small and the rest ten households are Semi-Medium farmers.

Table 4: Distribution of Landholdings

Sl. No	Farmer Classification	Land holding (ha)	No. of PAFs -	Percentage
1	Marginal	below 1	11	34.38
2	Small	1 - 2	11	34.38
3	Semi Medium	2 - 4	10	31.24
Total			32	100

2.5 Workforce Participation

Out of total 32 affected families' heads, only 14 PAFs' heads are engaged in agriculture, which is followed by business in which 10 PAFs' heads are engaged, followed by three each engaged in private and Government jobs. Besides this, one is availing pension and one is home maker.

Table 5: Occupation Status

Sl. No.	Employment Status	Number of PAFs	Percentage
1	Agriculture	14	43.75
2	Business	10	31.24
3	Private Job	3	9.38
4	Govt Job	3	9.38
5	Pension	1	3.13
6	Unemployed (House wife)	1	3.13
Total		32	100

1

https://des.assam.gov.in/sites/default/files/swf_utility_folder/departments/ecostat_medhassu_in_oid_3/thi s_comm/agri_census2010-11_phase1.pdf

Abbreviated Resettlement Action Plan cum Tribal Development Plan**ASSAM INTRA STATE TRANSMISSION SYSTEM ENHANCEMENT PROJECT****2.6 Income Distribution Pattern of PAFs**

As per census survey, the cumulative annual income of all earning members of 6 PAFs is below Rs. 1,00,000 income range, 17 PAFs is in the range of Rs. 1,00,001-2,00,000, for 2 PAFs it is in the range of Rs 2,00,001 – 3,00,000, for 1 PAF it is in the range of 3,00,001-4,00,000 and above Rs 5,00,000 for 6 PAFs. However, the socio-economic survey finds 9 PAFs having BPL ration card.

Table 6: Income Pattern of PAFs

Income Range in Rs/- per Annum	Number of PAFs	Percentage
<1,00,000	6	18.75
1,00,001-2,00,000	17	53.13
2,00,001-3,00,000	2	6.25
3,00,001-4,00,000	1	3.12
>5,00000	6	18.75
Total	32	100

2.7 Social Stratification of Affected Families

The majority (12) of PAFs belongs to General Castes. While 8 of the PAFs belong to Schedule Castes, 5 PAFs belong to Schedule Tribes and 7 PAFs belong to Other Backward Castes.

Table 7: Social Stratification of PAFs

Caste	Number of PAFs	Percentage
General	12	37.5
SC	8	25
ST	5	15.63
Other Backward Caste	7	21.88
Total	32	100

2.8 Impact on each PAF; disaggregated by gender and Tribals.

All the 32 Project Affected Families lost their land used for farming paddy crop; one paddy crop every year. This paddy was used to raise money for household requirements. The substation land is directly purchased by AEGCL on willing buyer and willing seller basis on a price fixed at par with the compensation offered by RFCTLARR 2013. Out of 32 PAFs, 3 PAFs are headed by females and 5 of PAFs belong to Scheduled Tribes.

Abbreviated Resettlement Action Plan cum Tribal Development Plan**ASSAM INTRA STATE TRANSMISSION SYSTEM ENHANCEMENT PROJECT****2.9 Impacts on Females and other Vulnerables**

Out of 32 PAFs, 3 PAFs are headed by females. A total of 17 PAFs are identified as vulnerable category, where 5 PAFs belongs to Schedule Tribes (one among these a female headed) and 10 PAFs belong to Schedule Castes. The details of impact on females and other vulnerable are provided below in Table 8.

Table 8: Impact on Females and other vulnerable

Sl. No.	Names of PAFs	Male/Female	Whether belong to ST/SC	Extent of Land loss in, ha.	Balance Land assets in, ha.	Occupation	Total Annual Income
1	Smt. Kalpana Mazumdar	Female	No	0.10	0.54	Unemployed (House wife)	1,80,000/-
2	Smt. Bina Rabha	Female	ST	1.11	4.68	Farmer	10,00,000/-

Abbreviated Resettlement Action Plan cum Tribal Development Plan*ASSAM INTRA STATE TRANSMISSION SYSTEM ENHANCEMENT PROJECT***2.10 Impacts on Tribals**

The substation land falls under the Bodoland Territorial Council (BTC) established under the Sixth Schedule of Constitution of India. As per the socio-economic survey, out of 32 PAFs, five PAFs belong to the Schedule Tribes, out of which one is Government pensioner and the occupation of the remaining four PAFs is Agriculture. The land loss, land owned after acquisition, occupation and annual income details are given below.

Table 9: Impact on Tribals PAFs

S. No.	Tribal PAFs	Land Loss in, ha.	Land assets after acquisition in, ha.	Occupation	Total Annual Income ² (Rs.)
1	SmtBina Rabha	1.11	4.68	Agriculture	10,00,000/-
2	Shri BhabenChandra Rabha	0.29	3.21	Govt pensioner	10,00,000/-
3	Shri KamaleswarBoro	0.26	1.34	Agriculture	1,80,000/-

5	Shri DimpolBoro	0.27	1.87	Business	8,00,000/-
Total		2.20 ha	13.5 ha		

3. Entitlement Framework**3.1 Provisions in the RPF/ ESMPPF**

The Resettlement Policy Framework, which is a part of the Environmental and Social Management Planning Framework for the Project; has broadly mentions three types of potential land related impacts that will require mitigation measures. The types of impacts are

- Loss of assets, including land and structures
- Loss of income or livelihood
- Collective impacts on groups, such as loss of common property resources and loss of access or limited access to such resources.

Every effort was made to minimize acquisition of land (the land had no assets attached to it) and to reduce any economic displacement impacts (the acquisition did not cause any physical displacement). Unforeseen impacts, if any, were also to be compensated in accordance with the principles of this resettlement planning framework.

²² Rough estimates.

Abbreviated Resettlement Action Plan cum Tribal Development Plan

ASSAM INTRA STATE TRANSMISSION SYSTEM ENHANCEMENT PROJECT

3.2 Impacts due to Land Acquisition

The acquired land 8.34ha belongs to 32 Titleholders, i.e., 32 PAFs, out of which 5 PAFs belongs to Schedule Tribes. There is no physical displacement of any PAFs. No private structures and common property resources were impacted due to the land acquisition.

The primary occupation of the members of PAFs is agriculture, business, Govt. service and private service. Hence, the impact on their income due to acquisition of land would be of low significance, which has been largely offset by payment of compensation. Each of the PAFs were getting an annual income of Rs. 1,000 to Rs. 42,000 from the paddy crops sown in the lands lost. These details are given in the Annexure 2.

3.3 Vulnerable Groups

Fifteen project affected families have been identified in vulnerable category as they belongs to Schedule Tribe and Schedule Caste community, and land compensation paid to all the Fifteen PAFs. One-time lump sum assistance of INR. 25,000/- to vulnerable families has to be paid to each affected vulnerable families. However, payment of assistance will be upon producing of necessary documentary evidence

3.4 Consultation and involvement of PAPs

The Environment and Social staff of PMU and PMC held discussions with focus groups and individuals to make them aware of the compensation procedures, impacts of sub-stations and transmission lines, as well as proposed project timelines. This exercise will continue during the construction of the project.

3.5 Public Consultation

Public consultations were conducted with local habitants (32 PAFs at Rangia and Kumarikata S/S) like economically poor communities, women, vulnerable groups and other local community leaders nearby substation location on 27 October 2021 and 5 May 2022 respectively. The payment of compensation of 30% advance payment amount was disbursed by AEGCL on 31 May 2021. The final payment of remaining 70% was made on 22 November 2021. The PAFs have been informed in advance about the consultations and accordingly they arranged the venue of the consultation in their village. The consultation followed strict protocols to prevent the spread of Covid-19 and to reiterate awareness about safe behavior. People participated voluntarily in the public consultation sessions to express their views about the proposed project. The community expressed their opinions freely on the project, its impact and suggestions for mitigating adverse impacts. On 27th October, 2021, Public Consultation was carried out with the PAFs to verify and

Abbreviated Resettlement Action Plan cum Tribal Development Plan*ASSAM INTRA STATE TRANSMISSION SYSTEM ENHANCEMENT PROJECT*

collect the necessary documents for compensation payment procedures. Community welcomed the construction of proposed sub-stations and associated activities. Local people are waiting eagerly for the implementation to start so they could receive better power and hoped for some employment generation. A summary of public consultations is attached in Table 10.

Details of consultation with public are provided in Annexure III. Participant's signatures are attached in Annexure-IV and photographs of the PAFs & Public consultation are attached in Annexure VII.

Table 10: Summary of Public Consultation

Issues Discussed	People's views and perceptions
General Perception	Majority communities (including ST and women) were aware of the proposed set up of substations and associated activities. Some others have heard it but not sure about the details of the project components. Almost all the people were positive and supportive towards the construction of proposed substations and associated activities.
Support of local people for the construction of proposed substations and associated activities	The consulted communities expressed their satisfaction with the proposed project and assured required support and cooperation during implementation of the proposed substations and associated activities.
Critical issues and concerns of the local people about the substation locations	Most of the communities expressed that there were no critical issues regarding the establishment of new substations.
Project site selection criteria	During public consultation with local people including PAFs, have expressed their views that the selection of the site for the construction of the S/S is free from sensitive receptors such as school, cremation ground, CPRs, etc. and they requested the project authorities to consider precautionary measures during of civil works to avoid construction related impacts.
Employment potential in the construction of substations	The majority felt that, during construction/operation of substations there may opportunities for local unemployed people for self-supporting business activity like establishment of small hotel/tea stall/grocery shop etc. Some of them requested that they should be involved not only in unskilled labour jobs but also in the supervisory work on temporary basis. They inform that instead of hiring people from outside the contractor should hire local people and give them an employment opportunity.

Abbreviated Resettlement Action Plan cum Tribal Development Plan*ASSAM INTRA STATE TRANSMISSION SYSTEM ENHANCEMENT PROJECT*

Issues Discussed	People's views and perceptions
Socio economic standing: land use, cropping pattern	The major sources of livelihood for the communities were agriculture, wage labour and small business, Government and private jobs, etc. Most of the community members practiced one time cropping in a year, mainly paddy and vegetable cultivation.
Source of drinking water	The main sources of drinking water was hand pumps. The other sources of drinking water were few numbers of ring wells and bore wells.
Negative impact on food grain, availability /land use	In general, the communities did not see any adverse impact on food/grain availability, though they loss some agriculture land, but they have sufficient cultivable land for cultivating paddy and other crops which is noted during the socio-economic census survey with the PAFs.
Will project cause widespread imbalance by cutting fruit and commercial trees in the locality	As the land is agriculture land and vacant land, hence it will not affect any trees due to construction of proposed substations.
Will project cause health and safety issues	Most of the communities did not foresee any health or safety issues from the construction of substations. Some of them suggested that necessary precautions must be taken to ensure safety of people during construction of sub- stations.
Protected areas	Most of the communities informed that protected areas are very far away from the project site. There are some religious places like Mandir and Namgarh are within approximately about 3 km radius of the Rangia and Kumarikata substations.
Will project setting change migration pattern of animals	None of the communities consulted were conscious of the presence of any migrant birds or animals in their localities and nearby proposed substations. They therefore did not foresee any impacts on animals, birds or their habitats from the construction of substations.
Migration pattern	Majority of the communities reported migration of young generation especially the boys to Guwahati and other cities in search of work.
Perceived benefits from project	The majority communities viewed that the proposed substations would contribute to minimize the prevailing energy crisis such as load shedding, and low voltage in the region. At community level, the people hoped that project will address the problems of low voltage, and irregular power supply to the households.
Perceived loss	If any temporary loss occurs during construction, the same can be compensated by AEGCL.

Annexure –V&VI gives the names of all participants including females and Tribal communities of the public consultation conducted during the socio-economic census survey of the PAFs on 5 May 2022.

Abbreviated Resettlement Action Plan cum Tribal Development Plan

ASSAM INTRA STATE TRANSMISSION SYSTEM ENHANCEMENT PROJECT

3.6 Continuous Consultation and Participation

AEGCL with PMC will carry out meaningful consultation as per requirement (Monthly consultation with local people nearby the S/S by PMU, PIU and PMC along with EPC Contractor) with affected people and other concerned stakeholders, including civil society and facilitate their informed participation. Consultation process undertaken under the directions of the PMU (i) will begin in the sub-project preparation stage and will be carried out on an on-going basis throughout the sub-project cycle (ii) will provide timely disclosure of relevant information that is understandable and readily accessible to groups and individuals, and specially women; (iii) is undertaken in an atmosphere free of intimidation or coercion; (iv) will be gender inclusive and responsive, and tailored to the needs of disadvantaged and vulnerable groups; and (v) shall enable the incorporation of all relevant views of affected people and other stakeholders into decision making, such as subproject design, mitigation measures, the sharing of development benefits and opportunities and implementation issues. Consultation will be carried out in a manner commensurate with the impacts on affected communities. The consultation process and its results will be documented and reflected in the environmental and social monitoring report. Feedback about project will be obtained time to time from PAFs during consultations. PAFs may approach GRC if any grievances arise.

Table 12: Summary of Public Consultation with Females and other vulnerable

Issues Discussed	People's views and perceptions
General Perception	The females and other vulnerable communities were aware of the proposed set up of substations and associated activities. They were positive and supportive towards the construction of proposed substations and associated activities.
Support of local vulnerable people for the construction of proposed substations and associated activities	The consulted females and other vulnerable communities stated their satisfaction with the proposed project. They assured that they will cooperate during the implementation of the construction works.
Critical issues and concerns of the local vulnerable people about the substation locations	The females and other vulnerable communities expressed that there were no serious issues regarding the establishment of new substations. They are of the opinion that during the time of construction proper solid waste management and proper wastewater management should adopted by the Contractor.
Project site selection criteria	During public consultation with females and other vulnerable people, they expressed their views that the selection of the site for the construction of the S/S is free vacant agricultural land and they requested to the authority concerned to take safety measures during time of civil works.
Employment potential in the construction of substations	The females and other vulnerable opined that only local labours should be engaged during the time of construction otherwise outside labours may bring some chronic disease which may affect the entire villages. They requested to give employment opportunities to the local people and the contractor should involve then not only in unskilled labour job but also in the supervisory work on temporarily basis. They also requested the project authority to give instructions

Abbreviated Resettlement Action Plan cum Tribal Development Plan*ASSAM INTRA STATE TRANSMISSION SYSTEM ENHANCEMENT PROJECT*

Issues Discussed	People's views and perceptions
	to the concerned contractor to engage only the local labours during the time of construction.
Socio economic standing: land use, cropping pattern	The major sources of livelihood for the females and other vulnerable communities were agriculture, wage labour. They practiced one time cropping in a year, mainly paddy and vegetable cultivation.
Source of drinking water	The main sources of drinking water was hand pumps and ring wells.
Negative impact on food grain, availability /land use	The females and other vulnerable communities did not see any impact on food/grain availability, though they lose some agriculture land, but they have sufficient cultivable land for cultivating paddy and other crops.
Will project cause widespread imbalance by cutting fruit and commercial trees in the locality	As the land is agriculture land and vacant land, hence it will not affect any trees due to construction of proposed substations.
Will project cause health and safety issues	Most of the females and other vulnerable communities did not foresee any health or safety issues from the construction of substations. Some of them suggested that necessary precautions must be taken to ensure safety of people during construction of substations.
Protected areas	They opined that protected areas are very far away from the project site. There are some religious places like Mandir and Namgarh are within approximately 3.5 km radius of the Rangia and Kumarikata substations.
Will project setting change migration pattern of animals	The presence of any migrant birds or animals in their localities and nearby proposed substations was not observed as informed by the females and other vulnerable people. Therefore, they inform that there would not be any unforeseen impacts on animals, birds or their habitats from the construction of substations.
Migration pattern	As reported by the females and other vulnerable, there is migration of young generation especially the boys to Guwahati and other cities in search of work.
Perceived benefits from project	They express their view that the proposed substations would minimize the energy crisis such as load shedding, and low voltage in their area. By construction of proposed substations it will reduce the power crisis.
Perceived loss	If any temporary loss occurs during the construction the same can be compensated by AEGCL.

Abbreviated Resettlement Action Plan cum Tribal Development Plan*ASSAM INTRA STATE TRANSMISSION SYSTEM ENHANCEMENT PROJECT*

Female and other vulnerable participant's list/signatures are attached in Annexure-V. The consultation was carried out with females near the substation land. Female participant's list/signatures are attached in Annexure-V.

3.8 Consultations with Tribals

A Free Prior Informed Consultation was conducted with tribals to make them participate in planning, incorporate their suggestions in design and to disseminate the information about the proposed sub-station construction and land to be acquired for the construction. A prior invitation through phone call and later communicated in person by AEGCL and PMC E&S specialists to tribal community about the consultation to be conducted with tribals in particular with tribal affected families.

Issues Discussed	People's views and perceptions
General Perception	The Tribal people were aware of the proposed set up of substations and associated activities. They were positive and supportive towards the construction of proposed substations and associated activities.
Support of local Tribal people for the construction of proposed substations and associated activities	The consulted tribal people stated their satisfaction with the proposed project. They assured that they will cooperate during the implementation of the construction works.
Critical issues and concerns of the local Tribal people about the substation locations	The Tribal people expressed that there were no serious issues regarding the establishment of new substations.

Abbreviated Resettlement Action Plan cum Tribal Development Plan*ASSAM INTRA STATE TRANSMISSION SYSTEM ENHANCEMENT PROJECT*

Issues Discussed	People's views and perceptions
Project site selection criteria	During public consultation Tribal people expressed their views that the selection of the site for the construction of the S/S is free vacant agricultural land and they urged the project authority to take safety measures during time of civil works.
Employment potential in the construction of substations	The Tribal people opined that only local labours should be engaged during the time of construction. They requested to provide employment opportunities to the local people and the contractor should involve local workers on temporarily basis.
Socio economic standing: land use, cropping pattern	The major sources of livelihood for the tribal communities were agriculture, business and government service. They practiced one time cropping in a year, mainly paddy and vegetable cultivation.
Source of drinking water	The main sources of drinking water was hand pumps and ring wells.
Negative impact on food grain, availability /land use	The tribal people did not see any impact on food/grain availability, though they lose some agriculture land, but they have sufficient cultivable land for cultivating paddy and other crops.
Will project cause widespread imbalance by cutting fruit and commercial trees in the locality	As the land is agriculture land and vacant land, hence it will not affect any trees due to construction of proposed substations.
Will project cause health and safety issues	The tribal communities did not foresee any health or safety issues from the construction of substations. Some of them suggested that necessary precautions must be taken to ensure safety of people during construction of sub- stations.
Protected areas	There are some religious places like Mandir and Namgarh and they informed that the protected areas are very far away from the project site.
Will project setting change migration pattern of animals	The tribal people inform that there would not be any unforeseen impacts on animals, birds or their habitats from the construction of substations.
Migration pattern	The migration of tribal generation especially the boys migrated to Guwahati and other cities in search of work.
Perceived benefits from project	They express their view that the proposed substations would minimize the energy crisis such as load shedding, and low voltage in their area. The tribal people inform that by construction of proposed substation it will reduce the power crisis.
Perceived loss	If any temporary loss occurs during construction the same can be compensated by AEGCL.

The consultation carried out with the Tribals PAFs and they inform that all the PAFs have received 100% land compensation payment. They are satisfied with the payment made

Abbreviated Resettlement Action Plan cum Tribal Development Plan

ASSAM INTRA STATE TRANSMISSION SYSTEM ENHANCEMENT PROJECT

to them. They inform that they have invested some amount in some small businesses like Piggery farming and grocery shops, that enhances their livelihoods. Tribal participant's list/signatures is attached in Annexure-IV.

3.9 Procedures used for negotiations with documents

In the event of acquisition of land is under 'The Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013', the determination of land value shall be in accordance with methods in the Act. However, acquisition of land in the project has been done by indicating the rate (equivalent to the rate under land acquisition using RFCTLARR 2013) to the land owners and buying the land at the same rate through direct purchase to save time. The document is provided at **Annexure VIII**. The step involved in 'direct negotiation' is described below.

- i. Consultation with the affected person has to be carried out and documented.
- ii. All negotiations have to be carried out in a transparent manner.
- iii. That land owners are aware of the basis on which compensation is calculated.
- iv. In case of procurement of land through private purchase, AEGCL shall ensure that compensation/rate for land is not less than the rate provided in the RFCTLARR 2013 and the Assam Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Rules, 2015.
- v. The finalization of land price/negotiation shall be through a committee.
- vi. In order to comply with this provision AEGCL may organize an awareness camp where provisions of new act in respect of basis/modalities of compensation calculation shall be explained to land owners with specific State provision if any.

3.10 Method of Valuation of Land

The Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act 2013 (RFCTLARR) provides government policy for land acquisition as well as rehabilitation and resettlement. The RFCTLARR Act 2013 has four schedules for minimum applicable norms for compensation based on market value, multiplier and solatium; resettlement and rehabilitation (R&R) entitlements to land owners and livelihood losers; and facilities at resettlement sites for displaced persons, besides providing flexibility to states and implementing agencies to provide higher norms for compensation and R&R. It also provides the baseline for compensation and has devised a sliding scale which allows States to fix the multiplier on basic rate of land depending

Abbreviated Resettlement Action Plan cum Tribal Development Plan*ASSAM INTRA STATE TRANSMISSION SYSTEM ENHANCEMENT PROJECT*

on distance from urban centers. Schedule I of the RFCTLARR 2013 outlines the proposed minimum compensation based on a multiple of market value. Schedule II outline the resettlement and rehabilitation entitlements to land owners and livelihood losers, which shall be in addition to the minimum compensation as per Schedule I.

The valuation used for affected land is finalize by the Revenue Circle Tamulpur (as per Govt. Revenue Department, registered rate at Bodoland Territorial Autonomous Council (BTAD) was Rs 3,59,183 per Bhiga as the base rate As per the Schedule I of the RFCTLARR 2013, outlines the proposed minimum compensation based on a multiple of market value i.e., the market value of land is determined as per section 26 of the Act which is the replacement cost. The payment of compensation is calculated by multiplication factor of 2 in rural areas beyond 10 kms of urban areas was applied with Solatium: 100%. Hence, the final rate came up as Rs 14,36,732/- per bhiga. The comparison is provided at Annexure IX . The proposed substation land has no structures and other assets available as the land is plain agriculture land.

3.11 Land Rate Fixation and Compensation Calculations

The base rate was fixed by the Revenue Circle, Tamulpur (Annexure VIII). The Compensation is calculated as per entitlement matrix of Resettlement Planning Framework, The base rate of the land per bhiga was @ of Rs 3,59,183/- market value x Multiplied 2 times + 100% Solatium (as per LAAR Act 2013) i.e. Rs 14,30,000/- has been calculated and paid to PAFs.

Table 15: Detailed compensation paid to each PAFs

3.12 Compensation and Livelihoods Assistance

Compensation has been paid based on consent award that has considered (refer Award statement in Annexure -I). Provision of compensation for loss of land and solatium was made under Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act (RFCTLARR), 2013. The compensation is paid as per the RFCTLARR Act 2013 of Schedule I that provides compensation to entitled persons. The market value of land is determined as per section 26 of the Act which is the replacement cost. The base rate for the land was finalized by the Revenue Circle, Tamulpur @ Rs 3,59,183 per Bhiga and the year 2018-19 was fixed for determining the base rate. The payment of compensation is calculated by multiplication factor of 2 in rural areas beyond 10 kms of urban areas on base rate was applied with 100% Solatium on it. Hence, the final rate came up as Rs 14,36,732/- per bhiga. The Compensation is calculated as per entitlement matrix of Resettlement Planning Framework. The acquisition of land and payment of compensation to affected families was completed.

The livelihoods assistance to thirteen affected families which were identified as vulnerable as they belong to Schedule Tribe and Schedule Caste community, was paid. As per S.No. 2 of the entitlement matrix (Table 17), One-time lump sum assistance of INR.

Abbreviated Resettlement Action Plan cum Tribal Development Plan**ASSAM INTRA STATE TRANSMISSION SYSTEM ENHANCEMENT PROJECT**

25,000/- to vulnerable families has to be paid to each affected vulnerable families. However, payment of assistance was upon production of necessary documentary evidence.

For disbursement of compensation to the PAFs, the sale permissions/NOC for sale of the proposed land for substation has been obtained from the Secretary, Boroland Territorial Council, Kokrajhar. Thereafter, the AEGCL made an agreement with the sellers (PAFs) for determining the payment modalities. The AEGCL then verified the land documents like Jamabandi, No-litigation certificates, non-encumbrance certificates and bank account details and other related details like PAN Card, Voter ID card, etc. for payment of 30(thirty) percent as advance from PMU, AEGCL through online mode to PAFs. During the time of aforesaid agreement the AEGCL has paid 30 (thirty) percent amount in advance to each PAFs of the total compensation payment. The sellers (PAFs) then initiated the process of demarcation of the proposed land for substation from the revenue Circle Office, Tamulpur. After completing the demarcation work, the final registration of Sale agreement was done with the PAFs and the balance 70 (seventy) percent of the total compensation payment was disbursed from PMU, AEGCL to the PAFs. During the process of registration agreement, a local lawyer was involved for preparation of final Sale Deed agreement and to execute the process of final registered agreement.

However, this amount excluded the expenses related to the land documents and other miscellaneous expenses. The cost related to land documents and miscellaneous expenses has been paid by AEGCL The detailed expenses is given in table 16 below:

Table 16: Expensed related to the land documents and other miscellaneous expenses

Sl. No	Activities	Cost in (INR)
1	Engagement of one no of Lawyer for execution for sale deed permission	95,000.00
2	No Litigation Certificate work	30,070.00
3	Demarcation of the proposed site	2,23,226.00
4	Special impress	10,000.00
5	Agreement of sale works related to 30% Advance payment	57,760.00
	Total	4,16,056.00

3.13 Compensation and livelihoods assistance to Females and other Vulnerable³.

³ Vulnerable PAFs are defined as those below poverty line (as per Government of India – Planning Commission, those households whose annual earning is less than Rs. 52, 260 (at 2009-2010 rates, classified as BPL, according to the planning Commission the poverty line for Assam (urban) is Rs.1008 per month per person), include STs residing in scheduled areas, schedule caste/ physically handicapped HoH/ disabled families, Women headed families, etc

Abbreviated Resettlement Action Plan cum Tribal Development Plan

ASSAM INTRA STATE TRANSMISSION SYSTEM ENHANCEMENT PROJECT

The land for the proposed substation is agriculture plain land and it's free from any crops and there is no physical displacement of any PAFs. AEGCL has purchased 8.34 ha land on willing buyer and willing seller basis on negotiated price with four time added to the rate fixed per bhiga, hence the R&R and livelihood assistance was not applicable.

3.14 Compensation, R&R, livelihoods assistance to Tribals

4. Income Restoration

Compensation has been paid to 32 PAFs as per the provision of compensation for loss of land and solatium under Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act (RFCTLARR), 2013. The PAFs inform that the compensation they received is sufficient to restore the income streams and most of them had already started the poultry and piggery farm, grocery shops. One PAF has opened a Dhaba (Restaurant) business opposite to substation land on the main road.

The socio-economic survey findings revealed that all the PAFs opened separate Accounts for the saving and expenditure purposes. Of the total land compensation amount received, all most all the PAFs kept 60% to 80% in their saving Account and remaining 20% to 40% used for daily expenses including medical expenses and educational purposes of their children Few PAFs repaid their loans after receiving the land compensation which they had taken from financial institutes for different purposes.

Agriculture is the main livelihood strategy of the majority of people of the PAFs. The better-off affected persons have prepared sizable fields for paddy cultivation and vegetables for their own consumption and some are able to sell the surplus paddy in the market. However, some of the PAFs are in better position where they engaged in

Abbreviated Resettlement Action Plan cum Tribal Development Plan

ASSAM INTRA STATE TRANSMISSION SYSTEM ENHANCEMENT PROJECT

Government and private jobs and some are doing business/shops in addition to agriculture activities.

The process of consultation to improve livelihoods of the PAFs, was carried out with PAFs for identifying livelihood improvement activities, as per thoughts, suggestions and requirement of PAFs. The livelihood restoration options provide a wide array of activities that can restore livelihoods for short term and long term, especially for people whose livelihood depends mainly on agriculture. However, most of the PAFs had already started the poultry, piggery farming and small business except some who depend on agriculture only. All the PAFs have sufficient alternate land for cultivation of paddy crops and vegetables after selling their land to AEGCL for the proposed substation. Further, training will be provided to enhance productivity in their existing agriculture lands and facilitate market linkages for their crops.

Due to acquisition of land for the proposed substation, there are no displacements of any families. In addition, no assets or trees or CPR's were impacted due to construction of sub-station. They only loss was their cultivable land where they used to cultivate paddy crop. All the PAFs have sufficient alternate land for cultivation of paddy crops and vegetables. The details are provided in table 20. Some of the PAFs are engaged in Government and private jobs and some are doing petty trade in addition to agriculture activities. The details are provided in the below tables. Hence, no major changes in in livelihoods.

5. Monitoring and Evaluation

The Project Director (GM level) is accountable for overall supervision, coordination and responsibility of the project planning, implementation, and monitoring. The PMC reports to PMU. The Environmental and Social (E&S) staff is dedicated for projects funded by the Asian Infrastructure Investment Bank (AIIB) to streamline decision-making and provide more autonomy for project execution and delivery. The E&S staff of AIIB project is part of PMU which is headed by Project Director (General Manager Project). At divisional level, the charge of E&S Officer is given to the concern's AGM. The AGM's will also act as project Manager for individual subprojects. The AGM's will work under the supervision of DGM at circle level.

PMU will monitor the implementation of ARAP/TDP to determine whether resettlement goals and other social safeguard requirements of the project have been achieved, and livelihood and living standards of the affected scheduled tribal peoples have been restored, and also to recommend on how to further improve ARAP/TDP implementation. PMU will prepare semi annual monitoring reports and submit AIIB for review and approval. The monitoring reports will focus on whether resettlement activities have complied with ESS2 and ESS3 of the project. The reports will also document consultations conducted with the PAFs, and the summaries of the issues identified, and the actions taken to resolve them. It will also provide a summary of grievances or complaints lodged by the PAFs and the actions taken to redress them, and also the specific activities conducted to restore and improve income sources and livelihoods of the PAFs.

Thus, the overall purpose of monitoring & evaluation will be to keep track of the ARAP implementation process, progress, learning lessons, and taking corrective actions to deal with emerging constraints and issues and fulfilment of project objectives. Monitoring and Evaluation will focus on the effectiveness of ARAP/TDP implementation, covering the progress of land acquisition and rehabilitation and resettlement activities, payment of compensation, the effectiveness of public consultation, and participation activities, the sustainability of income restoration, etc. It includes the following:

- (a) performance monitoring,
- (b) impact monitoring; and
- (c) end term evaluation or completion audit

The M&E will enable the PIU to get feedback from the field operatives to work out remedial measures to ensure achievement of targets within schedule. The progress of all aspects of land acquisition/ resettlement and income generation procedures will be monitored through the PIU. As it is important to ensure the ARAP/TDP implementation, so the affected people can regain their pre-Project socio-economic condition. In this respect, monitoring process of ARAP implementation is designed as an important part for overall functioning and project management and provided inputs procedures and outputs will be monitored as per the approved plan and schedule of actions.

ARAP cum TDP implementation will be evaluated internally by the PMU/PIU itself and the PMC Sr. Social Safeguard Expert and through field level officials, who will be regularly monitoring ARAP/ TDP implementation. The PMC will submit monthly progress report to update the Project Management Unit (PMU) on the land acquisition and resettlement plan implementation activities. The Sr. Social Safeguard Expert will submit semi-annual monitoring report on progress and compliance issues of ARAP/TDP implementation. and guide the PMU, and PMC to keep everything on track and carryout evaluation on the ARAP/TDP implementation. The information collected through the household survey will provide benchmarks for comparison on the socio-economic status of the PAFs in the project implementation period. A key objective will be the maintenance or improvement of the PAFs incomes and quality of lives.

6. Grievance Redressal

No grievances were received from the PAFs till the preparation of this ARAP/TDP. Complaints which may be arises during the project implementation period (Pre-Construction, During Construction and Post Construction) will be handled according to the following procedure:

1. Project-affected person approaches a member of the CGRC (Tier-1) in person or via the phone/WhatsApp. (Dedicated phone number will be assigned)
2. The Circle level GRC (Tier 1) member receives the grievances and records the details in the GRM logbook.
3. The CGRC (Tier-1) acknowledges the receipt of the grievance and provides a dated proof (official slip, text or WhatsApp message).
4. The CGRC (Tier-1) gathers information, visits site and interviews people to evaluate if they can find a resolution of the grievance within 10 working days.
5. The CGRC (Tier-1) informs grieved party of the proposed resolution in writing.

6. Grievied party can accept the proposed solution, which is duly recorded.
7. Grievied party may not accept the proposed solution, which is duly recorded.
8. If the CGRC (Tier-1) is unable to find a solution, or if the grievied party does not accept the proposition, the CGRC can automatically escalate the issue to the Tier -2 GRC, if grievied party agrees.
9. The Tier-2 GRC acknowledges the receipt of the grievance and provides a dated proof (official slip, text or WhatsApp message).
10. The Tier 2 GRC gathers information, visits site and interviews people to evaluate if they can find a resolution of the grievance within 20 working days.
11. The Tier 2 GRC informs grievied party of the proposed resolution in writing.
12. Grievied party can accept the proposed solution, which is duly recorded.
13. Grievied party may not accept the proposed solution, which is duly recorded.
14. The grievied party may seek their rights in the court of law.

The GRC meeting shall be held within 20 days of receiving a PAFs grievance for its solution if not resolved by Nodal officer. Detailed report should be submitted for complaints resolved at local level. Such report should also be presented before the GRC during the meeting. In case PAFs dissatisfied, the PAFs through GRC may request for a further review of the judgment of GRC by the Project Director. In such cases, the case will be forwarded to the PD with all documents. If the PAFs/disputant still remains dissatisfied, he/she may go to the formal court of law. In fact, the grievance redress system of the project does not bar any aggrieved persons to seek resolution from the court of law at any stage

Any aggrieved tribal person with a grievance will approach the GRM and can file their concerns.

Complaints which may be arises during the project implementation period (Pre Construction, During Construction and Post Construction) will be handled according to the following procedure:

1. Project-affected person approaches a member of the CGRC (Tier-1) in person or via the phone/WhatsApp. (Dedicated phone number will be assigned)
2. The Circle level GRC (Tier 1) member receives the grievances and records the details in the GRM logbook.
3. The CGRC (Tier-1) acknowledges the receipt of the grievance and provides a dated proof (official slip, text or WhatsApp message).
4. The CGRC (Tier-1) gathers information, visits site and interviews people to evaluate if they can find a resolution of the grievance within 10 working days.
5. The CGRC (Tier-1) informs grievied party of the proposed resolution in writing.
6. Grievied party can accept the proposed solution, which is duly recorded.
7. Grievied party may not accept the proposed solution, which is duly recorded.

Abbreviated Resettlement Action Plan cum Tribal Development Plan

ASSAM INTRA STATE TRANSMISSION SYSTEM ENHANCEMENT PROJECT

8. If the CGRC (Tier-1) is unable to find a solution, or if the grieved party does not accept the proposition, the CGRC can automatically escalate the issue to the Tier -2 GRC, if grieved party agrees.
9. The Tier-2 GRC acknowledges the receipt of the grievance and provides a dated proof (official slip, text or WhatsApp message).
10. The Tier 2 GRC gathers information, visits site and interviews people to evaluate if they can find a resolution of the grievance within 20 working days.
11. The Tier 2 GRC informs grieved party of the proposed resolution in writing.
12. Grieved party can accept the proposed solution, which is duly recorded.
13. Grieved party may not accept the proposed solution, which is duly recorded.
14. The grieved party may seek their rights in the court of law.

In the proposed sub-projects, the PIU/PMC would disseminate the project information to the local population. The AEGCL and Social and Environmental Safeguards Specialists/ PMC Social and Environmental Experts will conduct the consultation meetings and disclose the provisions under the sub-projects to the users. A copy of this will be kept at AEGCL, Divisional Office. Social and Environmental Safeguards Experts and PMC will regularly conduct awareness programs for the Tribals and other project stakeholders, about the entitlements they are eligible, provisions of GRC and the process to approach courts if necessary.

7. Implementation Schedule

The implementation of the ARAP/TDP was scheduled as per the overall project implementation timeframe. All activities related to land acquisition were planned and land compensation is paid prior to commencement of civil works. Public consultation, monitoring and grievance redress were undertaken intermittently during project implementation duration. The compensation has been paid to thirty two project affected households whose land has been acquired for construction of sub-stations. The 100% payment of compensation to the landowners is completed by AEGCL. The implementing schedule is given below in Figure.

Figure: Project Implementation Schedule of ARAP/TDP of Rangia/Kumarikata Substation

8. Costs and Budgets

The project does not displace any project affected persons due to acquisition of land for the substation. In addition, no assets or trees or CPR's were impacted due to construction of sub-stations. The Resettlement & Rehabilitation budget is for compensating 32 PAFs whose land has been acquired. The budget also takes into account the assistance eligible for 15 PAFs identified as vulnerable. Based on the above, the final resettlement budget for the substations is INR 8,98,95,869.00 /-. However, this amount excluded the expenses related to land documents and other miscellaneous expenses. The source of funds is 100% from the State Government share for payment of compensation to the PAFs for acquiring the substation land. As per present estimates, no further land acquisition would be required as the land acquired is sufficient for the construction of substation. The provisions to accounts for different types of contingencies, AEGCL will bear from the state share. The total cost is shown in the Table 24 below:

Abbreviated Resettlement Action Plan cum Tribal Development Plan**ASSAM INTRA STATE TRANSMISSION SYSTEM ENHANCEMENT PROJECT****ANNEXURE – III: Details of Public Consultation at Proposed Substation Sites**

A. Rangia/Kumarikata substation

Site/Location: Tamulpur, Village - Kashugaon, Circle/Block - Tamulpur, District -Tamulpur,

Date of Consultation: 27.10.2021 Type of Area (Urban/Rural/Highly Congested Urban: Rural

S.No	ISSUES	PARTICIPANTS' OPINION, COMMENTS AND SUGGESTIONS
SOCIAL		
1.	Have you heard about the Project or do you have any information about the project?	Yes, substation construction
2.	What is your opinion about this Project?	Good for us
3.	Do you support this Project?	Yes
4.	Do you think that the Project is necessary?	Yes
5.	What are your main concerns/issues about the project?	No issues
6.	Can you suggest how best to address your concerns/issues?	NA
7.	The proposed new land which may be government or privately owned. Would you volunteer to donate or sell the land for the Project?	Private land Purchased directly from 32 PAFs
8.	Do you expect any kind of compensation if there is loss to land or crops or trees during construction?	Though it is an agriculture land after getting land compensation, PAFs stop cultivating. Now the land is vacant land.
9.	If you need compensation, what kind of compensation will you be expecting (cash or kind) in case of land acquisition?	Compensation paid to the PAFs through Account transfer/NEFT
10.	Health status, Availability of Hospitals and over all environmental condition. Is there any chronic disease prevalent in this area and are you aware about HIV/AIDS and STP?	No Chronic disease, Aware about COVID-19/HIV/AIDS disease
11.	What positive impacts and/or benefits do you think the project will have?	Whole day power supply
12.	What negative impacts do you think the project will have?	No negative
13.	How safe do you think or consider the distribution feeder?	NA. As it is related to construction of Substation,
14.	Any criteria you would like to be considered for project design, construction and operation stage?	No
15.	How long have you been living in this area?	From childhood
16.	Are there any indigenous people/ tribal people or ethnic minority living in this area? If yes, how far and what is the name of tribe group and what is their	Yes Boro and Rabha tribes. Five PAFs affected due to construction of substation
